

Petroleum Equipment Distributors,

- Are you having reliability problems with plastic pulsers?
- Do your customers complain about inaccurate readings on a console or card system?

Let ICS introduce you to the new Smart Pulser SP1! With over 20 years of experience designing and manufacturing equipment for the Petroleum Equipment Industry, ICS has designed the new Smart Pulser SP1 to be rugged and durable enough for even the harshest conditions. Take a look at the following list of features:

- **ALL METAL Construction!**
- **All aluminum housing. (No plastic!)**
- **Machined aluminum coupling shaft. (No more breakage!)**
- **Stainless Steel encoder wheel is impervious to the elements.**
- **Dual bearing construction promotes long pulser life.**
- **Microprocessor controlled direction sensing eliminates over-counts due to pump vibration or meter backlash.**
- **Configuration setting made in pulser head for easy access.**
- **Intrinsically safe circuitry, no conduit required!**
- **Environmentally coated circuitry eliminates moisture problems.**
- **Heavily filtered power supply eliminates noise problems.**
- **Extended temperature operation. (-40 to 150 degrees F)**
- **Compatible with ALL Veeder Root mechanical computers (101, 2001, 2002, 2002E, VR-10, VR-10/4) for money or gallons.**
- **Small size allows mounting where other pulsers cannot.**
- **12VDC and 110VAC models available.**
- **Dual output model available.**
- **2 year warranty**

At ICS, we take pride in quality products and personal customer service. If you have any questions about the SP1, or if you have a special application, please don't hesitate to give us a call.
